### Environmentally Resistant Specifications

SMC offers a wide range of models suitable for various applications and operating environments. This includes models that can be used in environments that the basic model cannot, such as those where coolant liquid, water droplets/splashing, dust, etc., are present. When using in environments where the above are present, it is possible to improve the service life of the product by selecting a model ideal for use in such environments.

➔For details, refer to the [Web Catalogue](#).

#### Dust Resistant

- Cylinder with Stable Lubrication Function (Lube-retainer)
  - Micro-powder environments (10 to 100 μm)
- Dust-resistant Actuator (-XC92)
  - For use in environments with airborne micro-powder such as ceramic powder, toner powder, paper powder, and metallic powder
- With Heavy Duty Scraper (-XC4)
- With Coil Scraper (-XC35)
  - For use in dusty environments or in environments where die-cast equipment, construction machinery, etc., cause exposure to dirt or sand

#### Water Resistant

Water-resistant Cylinder

#### Corrosion Resistant (Stainless Steel)

- Rod, Retaining Ring, Rod End Nut Made of Stainless Steel (-XC6)
- Double Clevis and Double Knuckle Joint Pins Made of Stainless Steel (-XC27)
- Rod End Bracket Made of Stainless Steel
  - Single knuckle joint
  - Double knuckle joint
  - Rod end nut

#### With auto switch magnet

The overall length of the cylinder with an auto switch magnet is longer than that of the cylinder without an auto switch magnet by the length of the built-in magnet. For details, refer to the dimensions of each size.

#### 1 Mounting

B	Through-hole
A	Both ends tapped
L	Foot
LC	Compact foot
F	Rod flange
G	Head flange
D	Double clevis

- \* Mounting brackets are shipped together with the product but do not come assembled.
- \* Refer to 9 for the through-hole type mounting bolt.
- \* For cylinders with mounting options "L," "LC," or "F," the cylinder rod protrusion dimensions (Dimensions L and L1) vary from the standard cylinder. When only ordering the cylinder, order the rod end length increased by 10 mm (-XC2) cylinder. For details ⇨ p. 166

#### 2 Type

—	Pneumatic
H	Air-hydro*1

\*1 The bore sizes available for the air-hydro type are ∅ 20 to ∅ 100.

#### 3 Bore size

#### 4 Port thread type

—	M thread	∅ 12 to ∅ 25
—	Rc	
TN	NPT	∅ 32 to ∅ 100
TF	G	
F	Built-in One-touch fittings*1	

- \*1 The bore sizes available with One-touch fittings are ∅ 32 to ∅ 63. However, they cannot be selected for the air-hydro type.
- \* "TF" is not selectable for the air-hydro type.
- \* For cylinders without an auto switch magnet, M threads are compatible only with ∅ 32-5 mm stroke.

#### 5 Cylinder stroke (For details on the minimum stroke for auto switch mounting ⇨ p. 145)

- \* For long strokes exceeding the standard stroke range ⇨ p. 72
- \* For details on the manufacturing of intermediate strokes ⇨ p. 10
- \* The bore sizes available for the air-hydro type are ∅ 20 to ∅ 100.

#### 7 Body option

—	Rod end female thread
F	With boss on head end
C	With rubber bumper*1
M	Rod end male thread

- \*1 The type with a rubber bumper is not selectable for the air-hydro type.
- \* Combined body options, such as "FC," "FM," "FCM," and "CM" can be selected.

#### 9 Through-hole type mounting bolt

—	None
L	Shipped together

- \* Mounting bolt is shipped together with the product only when the mounting bracket is "B" (Through-hole). For details: Without auto switch magnet ⇨ p. 13 With auto switch magnet ⇨ p. 14

\* When a made-to-order option is selected, the mounting bolt is not shipped together with the product. Please order it separately.

#### 10 Rod end bracket (⇨ p. 26, 27)

—	None
D	Simple joint A type + Joint
E	Simple joint B type + Joint
V	Single knuckle joint
W	Double knuckle joint

- \* Options "D" and "E" must be used in combination with body option (Nil), the rod end female thread, and options "V" and "W" must be used in combination with body option (M), the rod end male thread.
- \* The applicable bore size for "D" and "E" is ∅ 32 to ∅ 100.
- \* A knuckle pin is not provided with the single knuckle joint (V). If a pin is required, please order it separately. For details ⇨ p. 26
- \* When a made-to-order option is selected, the rod end bracket cannot be selected. Please order it separately.

**Proposals for Improving Water and Dust-resistance**

SMC offers a wide range of models suitable for various operating environments. This includes models that can be used in environments that the basic model cannot, such as those where coolant liquid, water droplets/splashing, dust, etc., are present.

For details, refer to the **Web Catalog**.

- **Water-resistant cylinder**
- **Cylinder with Stable Lubrication Function (Lube-retainer)**

### Clean Series/Low Particle Generation

For details, refer to the **Web Catalogue**.

\* Stainless steel accessories are also available.  
For details ⇨ p. 26

### Moisture Control Tube IDK Series

When operating an actuator with a small bore size and a short stroke at a high frequency, dew condensation (water droplets) may occur inside the piping depending on the conditions.

Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the **Web Catalogue**.

## ⚠ Precautions

\*1 When ordering foot and compact foot brackets, the required quantity will be different depending on the bore size.

○ 12 to ○ 25:

• Without auto switch magnet: Order 2 pieces per cylinder.

• With auto switch magnet: Order 1 piece per cylinder. (Part number for a set of 2 foot brackets)

○ 32 to ○ 100:

• Order 2 pieces per cylinder.

\* Parts included with each type of bracket are as follows.

Foot, Compact foot, Flange: Body mounting bolts

Double clevis: Clevis pin, Type C retaining rings for axis, Body mounting bolts

\* For details on accessory brackets (Options) ⇨ p. 21 to 27

\* Foot, compact foot, flange brackets, etc., cannot be retrofitted for through-hole mounting (B).

## Manufacturing of Intermediate Strokes

Strokes are available in 1 mm increments.

As 3 different patterns are available, be sure to double-check the body dimensions before selecting.

For the air-hydro type, only ③ the exclusive body type “-XB10” is applicable.

How to Order: 57 mm stroke

CQ2B50 - 57 DZ -   

Stroke ●

Stroke suffix

—	A 18 mm spacer is installed on 75 mm stroke tube.	⇒ ①
XB10A	A 3 mm spacer is installed on 60 mm stroke tube.	⇒ ②
XB10	Makes 57 mm stroke tube.	⇒ ③

Symbol

### 1. Spacer-installed type 1

A spacer is installed on the standard stroke body (◆ indication). (Excludes the air-hydro type)

The ○ indicates the selectable stroke range.

Bore size [mm]	Stroke range	Stroke

Symbol

### 2. Spacer-installed type 2

**-XB10A**

A spacer is installed on the exclusive body (● indication). The overall length is shorter than that of the spacer-installed type 1.

(Excludes the air-hydro type)

The ○ indicates the selectable stroke range. (Strokes with the ● indication are not selectable.)

The — indicates strokes supported by the spacer-installed type 1.

## Construction

Without auto switch magnet

With rubber bumper

With boss on head end

With auto switch magnet

Built-in One-touch fittings

Rod end male thread

### Component Parts

No.	Description	Material	Note
1	Cylinder tube	Aluminium alloy	Hard anodised
2	Piston	Aluminium alloy	
3	Piston rod	Stainless steel	Ø 12 to Ø 25
		Carbon steel	Ø 32 to Ø 100, Hard chrome plating
4	Collar	Aluminium alloy	Ø 12 to Ø 40, Anodised
		Aluminium alloy casted	Ø 50 to Ø 100, Chromated, Painted
5	Retaining ring	Carbon tool steel	Phosphate coated
6	Bushing	Bearing alloy	For Ø 50 or more only
7	Rod end nut	Carbon steel	Zinc chromated
8	Bumper A	Urethane	Pneumatic type only

No.	Description	Material	Note
9	Bumper B	Urethane	Pneumatic type only
10	Centreing location ring	Aluminium alloy	Ø 20 to Ø 100, Hard anodised
11	One-touch fitting	—	Ø 32 to Ø 63
12	Piston seal	NBR	
13	Rod seal	NBR	
14	Gasket	NBR	
15	Magnet	—

## Moisture Control Tube IDK Series

When operating an actuator with a small bore size and a short stroke at a high frequency, dew condensation (water droplets) may occur inside the piping depending on the conditions. Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the [Web Catalogue](#).

## ⚠ Precautions

Refer to page 189 before handling the products.

## Manufacturing of Intermediate Strokes

Type	A spacer is installed in the standard stroke body. (5 mm increments)	A spacer is installed in the standard stroke body. (1 mm increments)	Exclusive body (-XB10)			
Part no.	Refer to "How to Order" for the standard model number. (⇨ p. 29)	Suffix "-X633" (p. 186) to the end of standard model number. (⇨ p. 29)	Suffix "-XB10" to the end of standard model number. (⇨ p. 29)			
Description	Strokes in 5 mm increments are available by installing a spacer in the standard stroke cylinder.	Strokes in 1 mm increments are available by installing a spacer in the standard stroke cylinder.	Strokes in 1 mm increments are available by using an exclusive body with the specified stroke.

Example	Part no.: CQ2WB50-65DZ CQ2WB50-75DZ with 10 mm width spacer inside The B dimension is 125.5 mm.	Part no.: CQ2WB50-72DZ-X633 CQ2WB50-75DZ with 3 mm width spacer inside The B dimension is 125.5 mm.	Part no.: CQ2WB50-65DZ-XB10 Makes 65 mm stroke tube. The B dimension is 115.5 mm.			

- Excludes the air-hydro type
- In the case of spacer type, intermediate strokes with bumper for Ø 40 to Ø 100, "-X633" is not available.
- In the case of exclusive body type with Ø 32 to Ø 100 (-XB10) with the stroke length exceeding 50 mm, reference values of the longitudinal dimension will be changed. Calculate length dimensions by deducting from those of 75 or 100 mm stroke models.

\*1 When ordering foot and compact foot brackets, the required quantity will be different depending on the bore size.  
 O 12 to O 25:  
 · Without auto switch magnet: Order 2 pieces per cylinder.  
 · With auto switch magnet: Order 1 piece per cylinder. (Part number for a set of 2 foot brackets)  
 O 32 to O 100:  
 · Order 2 pieces per cylinder.

\* Parts included with each type of bracket are as follows.  
 Foot, Compact foot, Flange: Body mounting bolts  
 \* For details on accessory brackets (Options) ⇨ p. 21 to 27  
 \* Foot, compact foot, flange brackets, etc., cannot be retrofitted for through-hole mounting (B).

### Through-hole Type Mounting Bolt for the CQ2W: Without Auto Switch Magnet

Mounting bolt for the through-hole mounting of the CQ2WB is available as an option.  
 Refer to the following for ordering procedures.  
 Order the actual number of bolts that will be used.

Type: Hexagon socket head cap screw  
 Material: Chromium molybdenum steel  
 Surface treatment: Zinc chromated

#### With auto switch magnet

The overall length of the cylinder with an auto switch magnet is longer than that of the cylinder without an auto switch magnet by the length of the built-in magnet. For details, refer to the dimensions of each size.

#### ① Mounting

B	Through-hole
A	Both ends tapped
L	Foot
LC	Compact foot
F	Rod flange
G	Head flange
D	Double clevis

- \* Mounting brackets are shipped together with the product but do not come assembled.
- \* Refer to ① for the through-hole type mounting bolt.
- \* For cylinders with mounting options "L," "LC," or "F," the cylinder rod protrusion dimensions (Dimensions L and L<sub>1</sub>) vary from the standard cylinder. When only ordering the cylinder, order the rod end length increased by 10 mm (-XC2) cylinder. For details ⇨ p. 166

#### ② Bore size

12	12 mm
16	16 mm
20	20 mm
25	25 mm

TN	NPT	
TF	G	
F	Built-in One-touch fittings*1	

- \*1 The bore sizes available with One-touch fittings are ∅ 32 to ∅ 50.
- \* For cylinders without an auto switch magnet, M threads are compatible only with ∅ 32-5 mm stroke.

#### ⑥ Body option

—	Rod end female thread
F	With boss on head end
M	Rod end male thread

- \* Combined body options "FM" can be selected.

#### ④ Cylinder stroke

T	Single acting, Spring extend

#### ⑧ Through-hole type mounting bolt

—	None
L	Shipped together

- \* Mounting bolt is shipped together with the product only when the mounting bracket is "B" (Through-hole). For details ⇨ p. 48
- \* **When a made-to-order option is selected, the mounting bolt is not shipped together with the product. Please order it separately.**

#### ⑨ Rod end bracket (⇨ p. 26, 27)

—	None
D	Simple joint A type + Joint
E	Simple joint B type + Joint
V	Single knuckle joint
W	Double knuckle joint

- \* Options "D" and "E" must be used in combination with body option (Nil), the rod end female thread, and options "V" and "W" must be used in combination with body option (M), the rod end male thread.
- \* The applicable bore size for "D" and "E" is ∅ 32 to ∅ 100.
- \* A knuckle pin is not provided with the single knuckle joint (V). If a pin is required, please order it separately. For details ⇨ p. 26
- \* When a made-to-order option is selected, the rod end bracket cannot be selected. Please order it separately.

## Symbol

### Made to Order Common Specifications (For details ⇨ p. 155 to 188)

Symbol	Specifications
-XA□	Change of rod end shape, spring return type only
-XB10	Intermediate stroke (Using exclusive body), Spring return type only
-XC2(A)	Rod end length increased by 10 mm (For foot and flange bracket)
-XC6	Piston rod/Retaining ring/Rod end nut material: Stainless steel
-XC26	With split pins for double clevis pin/ double knuckle joint pin and flat washers
-XC27	Double clevis pin/Double knuckle joint pin material: Stainless steel 304
-XC36	With boss on rod end
-XC85	Grease for food processing equipment
-X144	Special port location, with auto switch
-X202	Same full length dimension as the CQ1 series
-X203	Same L dimension from the rod cover as the CQ1 series
-X271	Fluororubber seals
-X1876	Cylinder tube: With concave boss on head end

\* Stainless steel accessories are also available.  
For details ⇨ p. 26

### Moisture Control Tube IDK Series

When operating an actuator with a small bore size and a short stroke at a high frequency, dew condensation (water droplets) may occur inside the piping depending on the conditions. Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the **Web Catalogue**.

## ⚠ Precautions

**Refer to page 189 before handling the products.**

## Manufacturing of Intermediate Strokes (Except single acting, spring return type)

Type	A spacer is installed in the standard stroke body.	
Part no.	Refer to "How to Order" for the standard model number. (⇨ p. 43)	
Description	Strokes in 1 mm increments are available by installing a spacer in the standard stroke cylinder.	
Stroke range	Bore size	Stroke range
	12 to 40	1 to 9
	50	1 to 19
Example	Part no.: CQ2B20-3T CQ2B20-5T with 2 mm width spacer inside The B dimension is 24.5 mm.

- \*1 When ordering foot and compact foot brackets, the required quantity will be different depending on the bore size.  
 O 12 to O 25:  
 · Without auto switch magnet: Order 2 pieces per cylinder.  
 · With auto switch magnet: Order 1 piece per cylinder. (Part number for a set of 2 foot brackets)  
 O 32 to O 50:  
 · Order 2 pieces per cylinder.
- \* Parts included with each type of bracket are as follows.  
 Foot, Compact foot, Flange: Body mounting bolts  
 Double clevis: Clevis pin, Type C retaining rings for axis, Body mounting bolts
- \* For details on accessory brackets (Options) ⇨ p. 21 to 27
- \* Foot, compact foot, flange brackets, etc., cannot be retrofitted for through-hole mounting (B).

## Dimensions of Each Mounting Bracket

The dimensions of each mounting bracket are the same as those of the standard type, double acting, single rod (except the configuration of the piston rod). Refer to pages 21 to 25.

### Through-hole Type Mounting Bolt for the CQ2: Without Auto Switch Magnet

Mounting bolt for the through-hole mounting of the CQ2B is available as an option. Refer to the following for ordering procedures. Order the actual number of bolts that will be used.

**Example) CQ-M3 x 25L 4 pcs.**

Type: Hexagon socket head cap screw  
Material: Chromium molybdenum steel  
Surface treatment: Zinc chromated

## Manufacturing of Intermediate Strokes

Type	A spacer is installed in the standard stroke body.	Exclusive body (-XB10)
Part no.	Refer to "How to Order" for the standard model number. (⇨ p. 53)	Suffix "-XB10" to the end of standard model number. (⇨ p. 53)
Description	Strokes in 5 mm increments are available by installing a spacer in the standard stroke cylinder.	Strokes in 1 mm increments are available by using an exclusive body with the specified stroke.
Stroke range	5 to 295	11 to 299
Example	Part no.: CQ2B160-165DCZ CQ2B160-175DCZ with 10 mm width spacer inside The B dimension is 266 mm.	Part no.: CQ2B160-165DCZ-XB10 Makes 165 mm stroke tube. The B dimension is 256 mm.

## Through-hole Type Mounting Bolt for the CDQ2

Mounting bolt for the through-hole mounting of the C(D)Q2B is available as an option. Refer to the following for ordering procedures. Order the actual number of bolts that will be used.

**Example) CQ-M12 x 100L 4 pcs.**

- \* To install a through-hole type mounting bolt, make sure to use the flat washer that is provided.
- \* Mounting bolts for stroke lengths exceeding 100 mm are not available. Secure the cylinder with both ends of the cylinder tube tapped or prepare mounting bolts separately.

## Manufacturing of Intermediate Strokes

Type	A spacer is installed in the standard stroke body.	Exclusive body (-XB10)
Part no.	Suffix "-X633" to the end of standard model number. (⇨ p. 59)	Suffix "-XB10" to the end of standard model number. (⇨ p. 59)
Description	Strokes in 5 mm increments are available by installing a spacer in the standard stroke cylinder.	Strokes in 1 mm increments are available by using an exclusive body with the specified stroke.
Stroke range	15 to 295	11 to 299
Example	Part no.: CQ2WB160-165DCZ-X633 CQ2WB160-175DCZ with 10 mm width spacer inside The B dimension is 266 mm.	Part no.: CQ2WB160-165DCZ-XB10 Makes 165 mm stroke tube. The B dimension is 256 mm.

## Through-hole Type Mounting Bolt for the CDQ2W

Mounting bolt for the through-hole mounting of the C(D)Q2WB is available as an option.

Refer to the following for ordering procedures. Order the actual number of bolts that will be used.

### Example) CQ-M12 x 100L 4 pcs.

- \* To install a through-hole type mounting bolt, make sure to use the flat washer that is provided.
- \* Mounting bolts for stroke lengths exceeding 100 mm are not available. Secure the cylinder with both ends of the cylinder tube tapped or prepare mounting bolts separately.

\* Solid state auto switches marked with “○” are produced upon receipt of order.

\* There are applicable auto switches other than those listed above. For details ⇨ p. 152

## Symbol

**Made to Order Common Specifications**  
(For details ⇨ p. 155 to 188)

Symbol	Specifications
-XA□	Change of rod end shape
-XB10	Intermediate stroke (Using exclusive body)
-XC2(A)	Rod end length increased by 10 mm (For foot and flange bracket)
-XC6	Piston rod/Retaining ring/Rod end nut material: Stainless steel
-XC26	With split pins for double clevis pin/ double knuckle joint pin and flat washers
-XC26□	Double clevis width/Double knuckle width 12.5 mm, 16.5 mm, or 19.5 mm: With double clevis and double knuckle joint
-XC27	Double clevis pin/Double knuckle joint pin material: Stainless steel 304
-XC85	Grease for food processing equipment
-XC88	Spatter-resistant coil scraper, Lube-retainer, Grease for welding (Piston rod: Stainless steel 304)
-XC89	Spatter-resistant coil scraper, Lube-retainer, Grease for welding (Piston rod: S45C)
-X271	Fluororubber seals
-X1876	Cylinder tube: With concave boss on head end

\* Stainless steel accessories are also available.

## Manufacturing of Intermediate Strokes

Type	A spacer is installed in the standard stroke body.	Exclusive body (-XB10)
Part no.	Refer to "How to Order" for the standard model number. (⇨ p. 65)	Suffix "-XB10" to the end of standard model number. (⇨ p. 65)
Description	Strokes in 1 mm increments are available by installing a spacer in the standard stroke cylinder.	Strokes in 1 mm increments are available by using an exclusive body with the specified stroke.
Stroke range	Bore size	Bore size
	Stroke range	Stroke range
Example	Part no.: CQ2BS50-57DCZ CQ2BS50-75DCZ with 18 mm width spacer inside The B dimension is 125.5 mm.	Part no.: CQ2BS50-57DCZ-XB10 Makes 57 stroke tube. The B dimension is 107.5 mm.

• In the case of exclusive body type with  $\varnothing$  32 to  $\varnothing$  100 (-XB10) with the stroke length exceeding 50 mm, reference values of the longitudinal dimension will be changed.  
Calculate length dimensions by deducting from those of 75 or 100 mm stroke models.

\*1 When ordering foot and compact foot brackets, order 2 pieces per cylinder.

\* Parts included with each type of bracket are as follows.

Foot, Compact foot, Flange: Body mounting bolts, Double clevis: Clevis pin, Type C retaining rings for axis, Body mounting bolts

\* For details on accessory brackets (Options) ⇨ p. 21 to 27

\* Foot, compact foot, flange brackets, etc., cannot be retrofitted for through-hole mounting (B).

## Dimensions of Each Mounting Bracket

The dimensions of each mounting bracket are the same as those of the standard type, double acting, single rod (except the configuration of the piston rod). Refer to pages 21 to 25.

## ⚠ Precautions

Refer to page 189 before handling the products.

-XC2(A)	Rod end length increased by 10 mm (For foot and flange bracket)
-XC8	Adjustable stroke cylinder/Adjustable extension type
-XC9	Adjustable stroke cylinder/Adjustable retraction type
-XC10	Dual stroke cylinder/Double rod type
-XC11	Dual stroke cylinder/Single rod type
-XC26	With split pins for double clevis pin/ double knuckle joint pin and flat washers
-XC27	Double clevis pin/Double knuckle joint pin material: Stainless steel 304
-XC36	With boss on rod end*1
-XC85	Grease for food processing equipment
-X1876	Cylinder tube: With concave boss on head end

\*1 The standard model can be used for the type with boss on the rod end (-XC36).

\* Stainless steel accessories are also available.  
For details ⇨ p. 26

## Moisture Control Tube IDK Series

When operating an actuator with a small bore size and a short stroke at a high frequency, dew condensation (water droplets) may occur inside the piping depending on the conditions.

Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the **Web Catalogue**.

## ⚠ Precautions

Refer to pages 189 and 190 before handling the products.

## Manufacturing of Intermediate Strokes

Type	A spacer is installed in the standard stroke body.	Exclusive body (-XB10)		
Part no.	Refer to "How to Order" for the standard model number. (⇨ p. 77)	Suffix "-XB10" to the end of standard model number. (⇨ p. 77)		
Description	Strokes in 1 mm increments are available by installing a spacer in the standard stroke cylinder.	Strokes in 1 mm increments are available by using an exclusive body with the specified stroke.		
Stroke range	Bore size	Stroke range	Bore size	Stroke range
	12, 16	1 to 29	—	—
	20, 25	1 to 49	40	6 to 99
	32 to 63	1 to 99	50, 63	11 to 99
Example	Part no.: CQ2KB50-57DZ CQ2KB50-75DZ with 18 mm width spacer inside The B dimension is 115.5 mm.		Part no.: CQ2KB50-57DZ-XB10 Makes 57 mm stroke tube. The B dimension is 97.5 mm.

\*1 When ordering foot and compact foot brackets, order 2 pieces per cylinder.

\* Parts included with each type of bracket are as follows.

Foot, Compact foot, Flange: Body mounting bolts

Double clevis: Clevis pin, Type C retaining rings for axis, Body mounting bolts

\* For details on accessory brackets (Options) ⇨ p. 21 to 27

\* Foot, compact foot, flange brackets, etc., cannot be retrofitted for through-hole mounting (B).

## Dimensions of Each Mounting Bracket

The dimensions of each mounting bracket are the same as those of the standard type, double acting, single rod (except the configuration of the piston rod). Refer to pages 21 to 25.

### Moisture Control Tube IDK Series

When operating an actuator with a small bore size and a short stroke at a high frequency, dew condensation (water droplets) may occur inside the piping depending on the conditions.

Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the **Web Catalogue**.

## ⚠ Precautions

**Refer to pages 189 and 190 before handling the products.**

## Through-hole Type Mounting Bolt for the CDQ2KW: With Auto Switch Magnet

Mounting bolt for the through-hole mounting of the CDQ2KWB is available as an option.

Refer to the following for ordering procedures.

Order the actual number of bolts that will be used.

For models without an auto switch magnet ⇨ p. 93

**Example) CQ-M3 x 40L 2 pcs.**

Type: Hexagon socket head cap screw  
Material: Chromium molybdenum steel  
Surface treatment: Zinc chromated

#### Cylinder Model with Auto Switch Magnet

If a cylinder with an auto switch magnet and without an auto switch is required, there is no need to enter the symbol for the auto switch.  
(Example) CDQ2B32R-25DMZ

#### Applicable Auto Switches / Refer to the Web Catalogue for further information on auto switches.

<b>-XC85</b>	Grease for food processing equipment

\* Stainless steel accessories are also available.  
For details ⇨ p. 26

Type	A spacer is installed in the standard stroke body.	
Part no.	Refer to "How to Order" for the standard model number. (⇨ p. 99)	
Description	Strokes in 1 mm increments are available by installing a spacer in the standard stroke cylinder.	
Stroke range	Bore size	Stroke range
	20, 25	1 to 49
	32 to 100	1 to 99
Example	Part no.: CQ2B50R-57DZ CQ2B50R-75DZ with 18 mm width spacer inside The B dimension is 115.5 mm.

\*1 When ordering foot and compact foot brackets, order 2 pieces per cylinder.

\* Parts included with each type of bracket are as follows.

Foot, Compact foot, Flange: Body mounting bolts, Double clevis: Clevis pin, Type C retaining rings for axis, Body mounting bolts

\* Foot, compact foot, flange brackets, etc., cannot be retrofitted for through-hole mounting (B).

### Moisture Control Tube IDK Series

When operating an actuator with a small bore size and a short stroke at a high frequency, dew condensation (water droplets) may occur inside the piping depending on the conditions.

Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the **Web Catalogue**.

## Dimensions of Each Mounting Bracket

The dimensions of each mounting bracket are the same as those of the standard type, double acting, single rod (except the configuration of the piston rod). Refer to pages 21 to 25.

## ⚠ Precautions

Refer to pages 189 and 190 before handling the products.

## Manufacturing of Intermediate Strokes

Type	A spacer is installed in the standard stroke body.	
Part no.	Refer to "How to Order" for the standard model number. (p. 108)	
Description	Strokes in 1 mm increments are available by installing a spacer in the standard stroke cylinder.	
Stroke range	Bore size	Stroke range
	40 to 100	1 to 99
Example	Part no.: CQ2WB50R-57DZ CQ2WB50R-75DZ with 18 mm width spacer inside The B dimension is 115.5 mm.

\*1 When ordering foot and compact foot brackets, order 2 pieces per cylinder.

\* Parts included with each type of bracket are as follows.

Foot, Compact foot, Flange: Body mounting bolts

\* Foot, compact foot, flange brackets, etc., cannot be retrofitted for through-hole mounting (B).

## Precautions

Refer to pages 189 and 190 before handling the products.

## Dimensions of Each Mounting Bracket

The dimensions of each mounting bracket are the same as those of the standard type, double acting, double rod (except the configuration of the piston rod). Refer to pages 40 to 42.

### Moisture Control Tube IDK Series

When operating an actuator with a small bore size and a short stroke at a high frequency, dew condensation (water droplets) may occur inside the piping depending on the conditions. Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the **Web Catalogue**.

## ⚠ Precautions

Refer to pages 189 and 190 before handling the products.

## Manufacturing of Intermediate Strokes

Type	A spacer is installed in the standard stroke body.	
Part no.	Refer to "How to Order" for the standard model number. (⇨ p. 115)	
Description	Strokes in 1 mm increments are available by installing a spacer in the standard stroke cylinder.	
Stroke range	Bore size	Stroke range
	12, 16	1 to 29
	20, 25	1 to 49
	32 to 100	1 to 99
Example	Part no.: CQP2B50-57D CQP2B50-75D with 18 mm width spacer inside The B dimension is 115.5 mm.	

- Excludes the air-hydro type
- In the case of spacer type, intermediate strokes with bumper for Ø 40 to Ø 100, it can be manufactured in 5 mm increments in 5 mm and 55 to 95 mm.

### How to Order

Without auto switch

CQP2B 50 - 10 T

With auto switch

CDQP2B 50 - 10 T - M9BW

**With auto switch magnet**  
The overall length of the cylinder with an auto switch magnet is longer than that of the cylinder without an auto switch magnet by the length of the built-in magnet. For details, refer to the dimensions of each size.

## Symbol

## Made to Order Common Specifications (For details ⇨ p. 155 to 188)

Symbol	Specifications
-XA□	Change of rod end shape
-XC6	Piston rod/Retaining ring/Rod end nut material: Stainless steel
-XC36	With boss on rod end
-XC85	Grease for food processing equipment
-X271	Fluororubber seals

\* Stainless steel accessories are also available.  
For details ⇨ p. 26

## Moisture Control Tube IDK Series

When operating an actuator with a small bore size and a short stroke at a high frequency, dew condensation (water droplets) may occur inside the piping depending on the conditions. Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the **Web Catalogue**.

## ⚠ Precautions

Refer to pages 189 and 190 before handling the products.

## Manufacturing of Intermediate Strokes (Except single acting, spring return)

Type	A spacer is installed in the standard stroke body.	
Part no.	Refer to "How to Order" for the standard model number. (⇨ p. 122)	
Description	Strokes in 1 mm increments are available by installing a spacer in the standard stroke cylinder.	
Stroke range	Bore size	Stroke range
	12 to 40	1 to 9
	50	1 to 19
Example	Part no.: CQP2B20-3T CQP2B20-5T with 2 mm width spacer inside The B dimension is 24.5 mm.

## Through-hole Type Mounting Bolt for the CQP2: Without Auto Switch Magnet

Mounting bolt for the through-hole mounting of the CQP2B is available as an option.

Refer to the following for ordering procedures.

Order the actual number of bolts that will be used.

**Example) CQ-M3 x 25L 2 pcs.**

Type: Hexagon socket head cap screw  
Material: Chromium molybdenum steel  
Surface treatment: Zinc chromated

## Manufacturing of Intermediate Strokes

Type	A spacer is installed in the standard stroke body.	Exclusive body (-XB10)
Part no.	Refer to "How to Order" for the standard model number. (⇨ p. 131)	Suffix "-XB10" to the end of standard model number. (⇨ p. 131)
Description	Strokes in 5 mm increments are available by installing a spacer in the standard stroke cylinder.	Dealing with the stroke in 1 mm increments by using an exclusive body with the specified stroke.
Stroke range	Bore size	Bore size
	Stroke range	Stroke range
Example	Part no.: CBQ2B40-45DC-HL CBQ2B40-50DC-HL with 5 mm width spacer inside. B dimension is 125 mm.	Part no.: CBQ2B40-45DC-HL-XB10 Makes 45 stroke tube. B dimension is 120 mm.

In the case of an exclusive body type for Ø 20, Ø 25, Ø 80 and Ø 100 (-XB10) with the stroke length exceeding 25 mm, the reference values of the longitudinal dimension will be changed.  
Subtract from 50, 75 and 100 stroke dimensions and figure it out.

\*1 When ordering foot and compact foot brackets, order 2 pieces per cylinder.

\*2 Parts included with each type of bracket are as follows. Foot, Compact foot, Flange: Body mounting bolts, Double clevis: Clevis pin, Type C retaining rings for axis, Body mounting bolts

\* Clevis pin and retaining rings are included with double clevis.

\* Foot, compact foot, flange brackets, etc., cannot be retrofitted for through-hole mounting (B).

### Moisture Control Tube IDK Series

When operating an actuator with a small bore size and a short stroke at a high frequency, dew condensation (water droplets) may occur inside the piping depending on the conditions.  
Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the **Web Catalogue**.

## ⚠ Precautions

Refer to pages 189 to 191 before handling the products.

## Dimensions of Each Mounting Bracket

The dimensions of each mounting bracket are the same as those of the standard type, double acting, single rod (except the configuration of the piston rod). Refer to pages 21 to 25.

## Through-hole Type Mounting Bolt for the C(D)BQ2

Mounting bolt for the through-hole mounting of the C(D)BQ2 is available as an option. Refer to the following for ordering procedures. Order the actual number of bolts that will be used.

**Example) CQ-M5 x 75L 4 pcs.**

\* Be sure to use the attached flat washers when mounting  
O 20 and O 25 cylinders with through-holes.

Type: Hexagon socket head cap screw  
Material: Chromium molybdenum steel  
Surface treatment: Zinc chromated

### [Stainless Steel Mounting Screw Kit]

The following stainless steel mounting screw kit (with nuts) is available. Use it in accordance with the operating environment. (Since auto switch spacer (for BQ-2) is not included, order BQ-2 separately.)

BBA2: For D-A7/A8/F7/J7 types

The above stainless steel screws are used when a cylinder is shipped with the D-F7BA/F7BAV auto switches.

When only one auto switch is shipped independently, the BBA2 is attached.

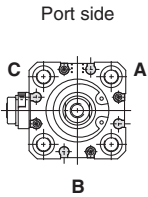

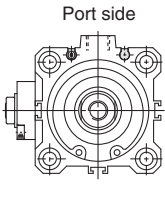

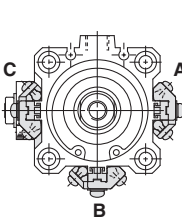

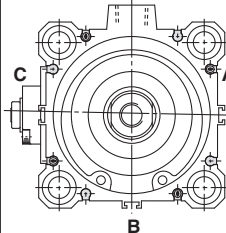

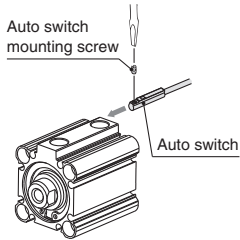

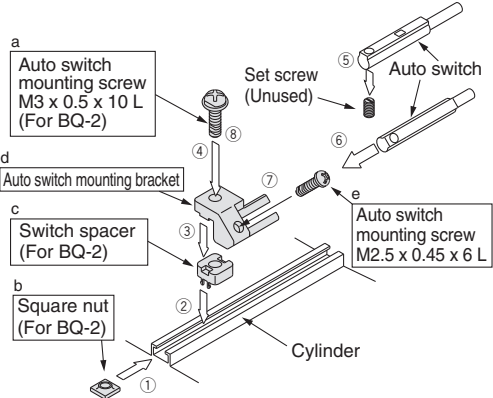

\* Refer to the **Web Catalogue** for details on the BBA2.

\* When the D-M9□A(V) type is mounted, order auto switch mounting brackets BQ2-012S, BQ-2, and the stainless steel mounting screw kit BBA2 separately.

## Auto Switch Connections and Examples

### Sink Input Specifications

#### 3-wire, NPN

#### 2-wire

### Source Input Specifications

#### 3-wire, PNP

#### 2-wire

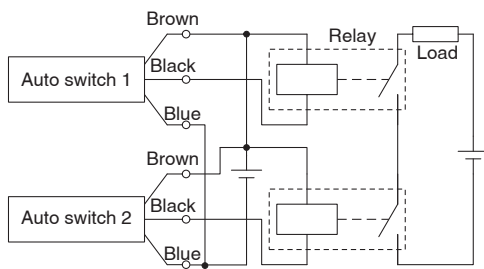

Connect according to the applicable PLC input specifications, as the connection method will vary depending on the PLC input specifications.

### Examples of AND (Series) and OR (Parallel) Connections

\* When using solid state auto switches, ensure the application is set up so the signals for the first 50 ms are invalid. Depending on the operating environment, the product may not operate properly.

#### 3-wire AND connection for NPN output

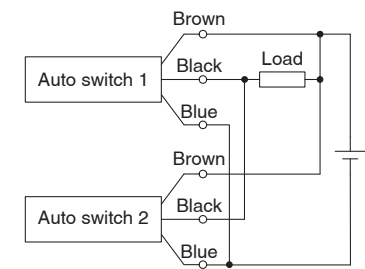

(Using relays)

(Performed with auto switches only)

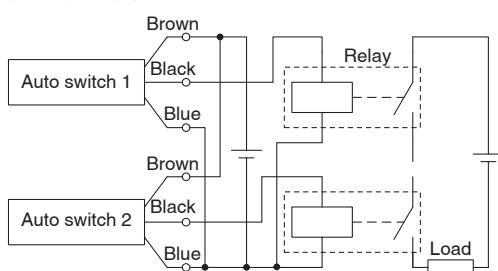

#### 3-wire OR connection for NPN output

#### 3-wire AND connection for PNP output

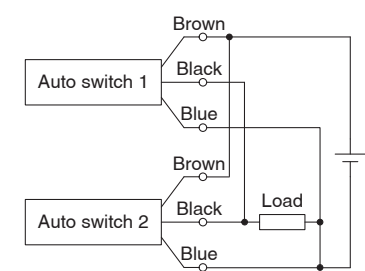

(Using relays)

(Performed with auto switches only)

#### 3-wire OR connection for PNP output

#### 2-wire AND connection

When two auto switches are connected in series, a load may malfunction because the load voltage will decline when in the ON state. The indicator lights will light up when both of the auto switches are in the ON state. Auto switches with a load voltage less than 20 V cannot be used. Please contact SMC if using AND connection for a heat-resistant solid state auto switch or a trimmer switch.

Example) Load voltage at ON  
 Power supply voltage: 24 VDC  
 Internal voltage drop: 4 V  
 Load voltage at ON = Power supply voltage –  
 Internal voltage drop x 2 pcs.  
 = 24 V – 4 V x 2 pcs.  
 = 16 V

#### 2-wire OR connection

(Solid state)  
 When two auto switches are connected in parallel, malfunction may occur because the load voltage will increase when in the OFF state.

(Reed)  
 Because there is no current leakage, the load voltage will not increase when turned OFF. However, depending on the number of auto switches in the ON state, the indicator lights may sometimes grow dim or not light up, due to the dispersion and reduction of the current flowing to the auto switches.

Example) Load voltage at OFF  
 Leakage current: 1 mA  
 Load impedance: 3 kΩ  
 Load voltage at OFF = Leakage current x 2 pcs. x  
 Load impedance  
 = 1 mA x 2 pcs. X 3 kΩ  
 = 6 V

# CQ2 Series Simple Specials

The following changes are dealt with through the Simple Specials System.

Please contact your local sales representative for more details.

## 1 CQ2 (Ø 12 to Ø 25): Change of Rod End Shape

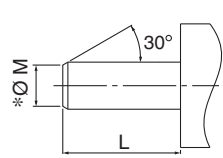

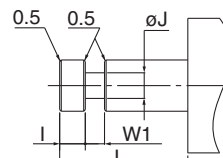

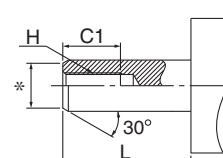

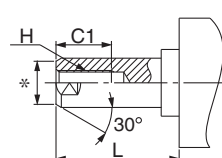

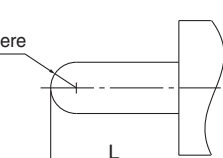

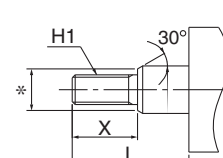

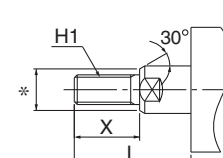

### Applicable Series

Description		Model	Action	Symbol for change of rod end shape
CQ2 (Ø 12 to Ø 25)	Standard	CQ2	Double acting, Single rod Single acting (Spring return)*1	XA1, XA2, XA6 XA7, XA11 XA17, XA18
		CQ2W	Double acting, Double rod

	Non-rotating rod	CQ2KW	Double acting, Double rod (Round rod side)	XA1, XA2, XA6, XA7 XA11, XA17, XA18

\*1 A single acting, spring extend type is available as a special order.

### Precautions

- SMC will make appropriate arrangements if no dimension, tolerance, or finish instructions are given in the diagram.
- Standard dimensions marked with "\*" will be as follows to the rod diameter (D).  
Enter any special dimension you require.  
Ø 12, Ø 16 → D-1 mm    Ø 20, Ø 25 ← D-2 mm
- In the case of a double rod, fill in the dimension when the rod is retracted.
- When changing the rod end shape on both sides, fill in the construction specification sheets for the left side (piston rod A) and for the right side (piston rod B) respectively.  
Selected model (Example) **CQ2WB32-10DZ-XA7A18**  
Use an XA7 specification sheet for the left side (piston rod A) and an XA18 specification sheet for the right side (piston rod B).
- For the XA17 and XA18, the male thread diameter cannot be the same as the piston rod external diameter.
- Please contact SMC separately for piston rod end pattern part numbers other than those in the table to the left or for other manufacturing requirements.
- The rod end nut is not included if the H1 dimension is changed from the standard product.

# CQ2 Series Simple Specials

The following changes are dealt with through the Simple Specials System.

Please contact your local sales representative for more details.

## 1 CQ2 (∅ 32 to ∅ 100)/CQ2 Large Bore Size (∅ 125 to ∅ 200): Change of Rod End Shape

Description	Model	Action	Symbol for change of rod end shape
Standard	<b>CQ2</b>	Double acting, Single rod Single acting (Spring return)*1	XA1 to 23 XA26 to 30
	<b>CQ2W</b>	Double acting, Double rod

		Double acting, Double rod (Round rod side)	
Large bore size	<b>CQ2</b>	Double acting, Single rod	
	<b>CQ2W</b>	Double acting, Double rod	

\*1 A single acting, spring extend type is available as a special order.

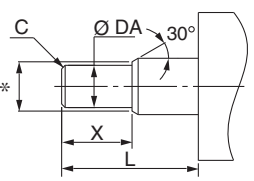

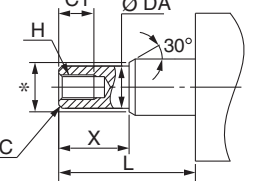

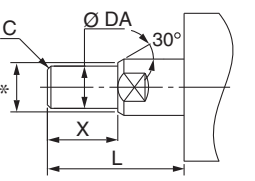

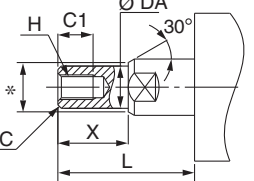

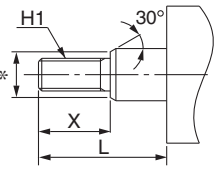

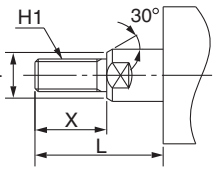

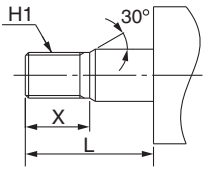

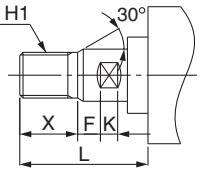

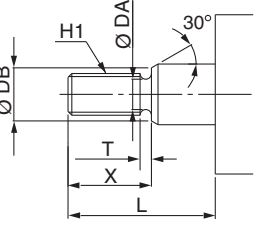

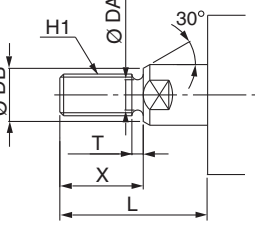

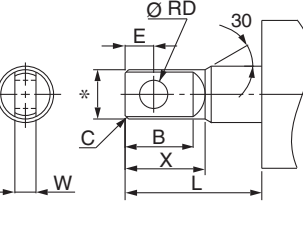

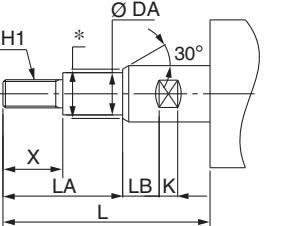

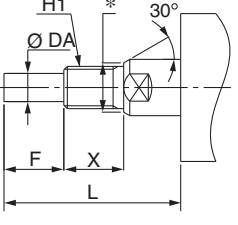

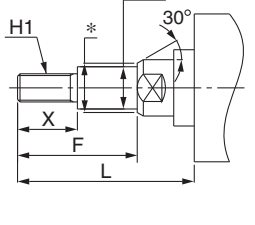

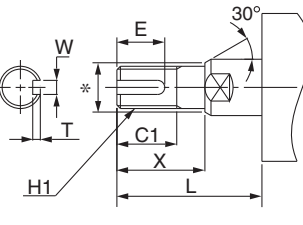

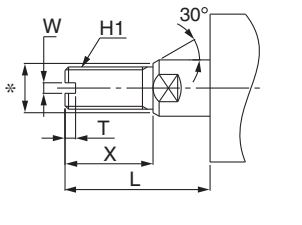

### Precautions

- SMC will make appropriate arrangements if no dimension, tolerance, or finish instructions are given in the diagram.
- Standard dimensions marked with "\*" will be the rod diameter (D) - 2 mm. Enter any special dimension you require.
- In the case of a double rod, fill in the dimension when the rod is retracted.
- When changing the rod end shape on both sides, fill in the construction specification sheets for the left side (piston rod A) and for the right side (piston rod B) respectively.  
Selected model (Example) **CQ2WB32-10DZ-XA7A18**  
Use an XA7 specification sheet for the left side (piston rod A) and an XA18 specification sheet for the right side (piston rod B).
- The rod end nut is not included if the H1 dimension is changed from the standard product.

## 1 Heat-resistant Cylinder (-10 to 150 °C)

Symbol  
**-XB6**

The seal material and grease used in this air cylinder have been changed so that it can be used at temperatures between -10 up to 150 °C.

Description	Model	Action	Note
Compact cylinder	<b>CQ2</b>	Double acting, Single rod	Excludes models with a rubber bumper or auto switch magnet
	<b>CQ2W</b>	Double acting, Double rod	
Axial piping	<b>CQP2</b>	Double acting, Single rod	Excludes the air-hydro type
Non-rotating rod	<b>CQ2K</b>	Double acting, Single rod	Excludes models with a rubber bumper or auto switch magnet
	<b>CQ2KW</b>	Double acting, Double rod	

- \* Operate without lubrication from a pneumatic system lubricator.
- \* Please contact SMC for details on the maintenance intervals for this cylinder as they differ from those of the standard cylinder.
- \* In principle, it is impossible to make a heat-resistant cylinder with a built-in magnet or with an auto switch. But, as for the one with an auto switch, and the heat-resistant cylinder with a heat-resistant auto switch, since it will be differed depending on the series, please contact SMC.
- \* Piston speed ranges from 50 to 500 mm/s
- \* Please contact SMC for models with a rubber bumper.

### How to Order

### Specifications

<b>Ambient temperature range</b>	-10 °C to 150 °C
<b>Seal material</b>	Fluororubber
<b>Grease</b>	Heat-resistant grease
<b>Specifications other than the above and dimensions</b>	Same as the standard type

### Warning Precautions

Be aware that smoking cigarettes, etc., after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

## 2 Cold-resistant Cylinder (-40 to 70 °C)

Symbol  
**-XB7**

The seal material and grease used in this air cylinder have been changed so that it can be used even at lower temperature down to -40 °C.

Description	Model	Action	Note
Compact cylinder	<b>CQ2</b>	Double acting, Single rod	Applicable to $\varnothing$ 12 to $\varnothing$ 40 Excludes models with a rubber bumper, auto switch magnet, or mounting bracket
	<b>CQ2W</b>	Double acting, Double rod	
Axial piping	<b>CQP2</b>	Double acting, Single rod	

- \* Operate without lubrication from a pneumatic system lubricator.
- \* Use dry air which is suitable for heatless air dryer, etc., not to cause the moisture to be frozen.
- \* Please contact SMC for details on the maintenance intervals for this cylinder as they differ from those of the standard cylinder.
- \* Mounting auto switch is impossible.
- \* Please contact SMC for models with a rubber bumper.

### How to Order

### How to Order

Standard model no. **-XC8**

Adjustable stroke cylinder/Adjustable extension type

### Specifications

Stroke adjustment range [mm]	0 to 10
Specifications other than the above	Same as the standard type

### Precautions

#### Warning

1. When the cylinder is operating, if something gets caught between the stopper bracket for adjusting the stroke and the cylinder body, it could cause bodily injury or damage the peripheral equipment. Therefore, take preventive measures as necessary, such as installing a protective cover.
2. To adjust the stroke, make sure to secure the wrench flats of the stopper bracket with a wrench, etc., before loosening the lock nut. If the lock nut is loosened without securing the stopper bracket first, be aware that the area that joins the load to the piston rod or the area in which the piston rod is joined with the load side and the stopper bracket side could loosen first. This may cause an accident or malfunction.

The retract stroke of the cylinder can be adjusted by the adjustment bolt.

Description	Model	Action	Note
Compact cylinder	<b>CQ2</b>	Double acting, Single rod	Excludes models with a rubber bumper or mounting bracket
Non-rotating rod	<b>CQ2K</b>	Double acting, Single rod	Excludes models with a rubber bumper or mounting bracket

### How to Order

Standard model no. **-XC9**

Adjustable stroke cylinder/Adjustable retraction type

(After adjusting the stroke, the double-side cushion type becomes a single-side cushion type. CQ2 is without cushion.)

### Specifications

Stroke adjustment range [mm]	0 to 10
Specifications other than the above	Same as the standard type

### Precautions

#### Warning

- When air is supplied to the cylinder, if the stroke adjustment bolt is loosened in excess of the allowable stroke adjustment amount, be aware that the stroke adjustment bolt could fly off or air could be discharged, which could injure personnel or damage the peripheral equipment.
- Adjust the stroke when the cylinder is not pressurized. If it is adjusted while in a pressurized state, the seal of the adjustment section could become deformed, leading to air leakage.

#### Functional description of dual stroke cylinder

#### Stroke S<sub>1</sub> and stroke S<sub>2</sub> can be operated individually.

#### Double output is possible.

#### Precautions

#### ⚠ Caution

1. Remove the temporary fixing nut and flat washer from the mounting bolt, and secure the cylinder properly with the mounting bolt.
2. Although the cylinder can be detached by removing the nut, do not detach it for purposes other than replacing the seal.
3. Do not supply air to the cylinder until it has been properly secured with the mounting bolt.  
If air is supplied prematurely, the cylinder may lurch, resulting in injury to nearby personnel or damage to peripheral equipment.
4. The removed nut and flat washer are not used to secure the body.

### Warning Precautions

Be aware that smoking cigarettes, etc., after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

<Not installable>

Food zone.....An environment where food which will be sold as merchandize, directly touches the cylinder's components

Splash zone.....An environment where food which will not be sold as merchandize, directly touches the cylinder's components

<Installable>

Non-food zone.....An environment where there is no contact with food

- \* Avoid using this product in the food zone. (Refer to the figure above.)
- \* When the product is used in an area of liquid splash, or a water resistant function is required for the product, please consult SMC.
- \* Operate without lubrication from a pneumatic system lubricator.
- \* Use the following grease pack for the maintenance work. GR-H-010 (Grease: 10 g)
- \* Please contact SMC for details on the maintenance intervals for this cylinder, which differ from those of the standard cylinder.

For the single rod cylinder of the CQ2 series, the L dimension (from the rod face to the rod end) and the rod end female thread size are the same as the CQ1 series (previous model).

Description	Model	Action	Note*1, 2
Compact cylinder	CQ2	Double acting, Single rod	Female thread only Applicable to $\varnothing 20$ , and $\varnothing 32$
		Single acting (Spring return/extend)	Female thread only Applicable to $\varnothing 20$ , and $\varnothing 32$

- \*1 Bore sizes  $\varnothing 16$  and  $\varnothing 25$  are not supported by the CQ1 and are therefore not applicable.
- \*2 Bore sizes  $\varnothing 12$  and  $\varnothing 40$  to  $\varnothing 100$  have the same dimensions as the -X202 and are therefore not applicable.
- \* The rod end male thread type is selectable for the standard type of the CQ2 series.

## CQ2 Series

# Specific Product Precautions 1

Be sure to read this before handling the products. For safety instructions, actuator, and auto switch precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smc.eu>

### <Precautions for each series>

#### Mounting

#### ⚠ Caution

The CQ2 series compact cylinders are designed to create compact mechanical equipment and promote space saving. Thus, if it is used in the same manner as existing cylinders such as tie-rod cylinders, it may degrade the performance. Pay sufficient attention to the operating conditions when using.

##### 1. Allowable lateral load

Lateral load that can apply to the piston rod end is limited. If a cylinder is used with a lateral load over the limit, it may cause air leakage due to abnormal friction of seals, galling of cylinder tubes and pistons, or abnormal friction of the bearing part. The lateral load applied to the piston rod must be within the allowable range indicated in this catalogue. When the load exceeds the limit, use a double rod cylinder, install a guide, or change the bore size to suit the load in order to make the load within the allowable range. As a standard product, an anti-lateral load type cylinder that is resistant to approx. 2 times more than the existing compact CQ2 series is also available (page 65).

##### 2. Connection with a workpiece

When a workpiece is mounted on the piston rod end, connect them aligning the centre of piston rod and a workpiece. If they are off-centre, lateral load is generated and phenomena mentioned in (1) may occur. In order not to apply the off-centre load, use of a floating joint or simple joint is recommended.

##### 3. Simultaneous use of multiple cylinders

It is difficult to control the speed of pneumatic cylinders. The following conditions cause speed change: change in supply pressure, load, temperature and lubrication, performance difference of each cylinder, deterioration of each part over time, etc. A speed controller can be used to control the speed of multiple cylinders simultaneously for a short period of time, but depending on conditions, it may not work as desired. If multiple cylinders cannot operate simultaneously, unreasonable force is applied to the piston rod because cylinder positions may not be the same. This may cause abnormal friction of seals and bearings, and galling of cylinder tubes and pistons. Do not use an application to operate several cylinders simultaneously by adjusting cylinder speed. If this is inevitable, use a high rigid guide against load, so that the cylinder is not damaged even when the each cylinder output is slightly different.

### <Precautions for each series>

#### Retaining Ring Installation/Removal

#### ⚠ Caution

1. For installation and removal, use an appropriate pair of pliers (tool for installing a type C retaining ring).
2. Even if a proper plier (tool for installing a type C retaining ring) is used, it is likely to inflict damage to a human body or peripheral equipment, as a retaining ring may be flown out of the tip of a plier (tool for installing a type C retaining ring). Be much careful with the popping of a retaining ring. Besides, be certain that a retaining ring is placed firmly into the groove of rod cover before supplying air at the time of installment.

### <Precautions for double rod cylinders>

#### Mounting

#### ⚠ Warning

1. Do not apply reverse torque to the piston rods sticking out from both sides of this cylinder at the same time. The torque makes connection threads inside loosen, which may cause an accident or malfunction.  
Install or remove loads while the piston rod width across flat is secured. Do not fix the other side of the piston rod width across flat and apply reverse torque.

### <Precautions for non-rotating rod cylinders>

#### Mounting

1. Install or remove loads while the piston rod width across flat is secured.

## CQ2 Series

# Specific Product Precautions 2

Be sure to read this before handling the products. For safety instructions, actuator, and auto switch precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smc.eu>

### <Precautions for non-rotating rod cylinders>

#### Mounting

#### 2. Using a non-rotating rod cylinder

Avoid using the air cylinder in such a way that rotational torque would be applied to the piston rod. If rotational torque is applied, the non-rotating guide will deform, causing a loss of non-rotating accuracy. Use the table below as a guide for the allowable rotational torque ranges.

Allowable rotational torque	12	16	20	25	32	40	50	63
N·m or less	0.04	0.15	0.20	0.25	0.44	0.44	0.44	0.44

Operate the cylinder in such a way that the load to the piston rod is always applied in the axial direction.

- When a workpiece is secured to the end of the piston rod, ensure that the piston rod is retracted entirely, and place a wrench on the portion of the rod that protrudes beyond the section. Also, tighten in a way that prevents the tightening torque from being applied to the non-rotating guide.

### <Precautions for water-resistant cylinders>

#### Handling Precautions

## Caution

- If there is a possibility of liquid splashing on cylinder fittings, use insert fittings, self-align fittings, steel piping, etc. Consider the compatibility of liquid components and piping materials before using.
- When selecting seals, generally use NBR (nitrile rubber) seals with liquids that do not contain chlorine and sulfur, and use FKM (fluoro rubber) seals with liquids that contain chlorine and sulfur. However, depending on the type and the brand of liquid (such as coolant liquid) that splashes on the cylinder, the operating life of seals may be reduced dramatically.

#### Examples of coolant liquid

Shimiron, PA-O-5 (Daido Chemical Industry Co., Ltd.) (NBR seals)  
 Noritake Cool, AFG-S (Noritake Co., Ltd.) (NBR seals)  
 Yushiroken, S-46S (Yushiro Chemical Industry Co., Ltd.) (NBR seals)  
 Yushiroken, EC-50-T3 (Yushiro Chemical Industry Co., Ltd.) (NBR seals)  
 Yushiron Oil, No. 23 (Yushiro Chemical Industry Co., Ltd.) (FKM seals)  
 Daphne Cut, Hs-1 (Idemitsu Kosan Co., Ltd.) (FKM seals)

- When the cylinder is exposed to dust or sand, or is used in a place where liquid from the piston rod splashes, use the heavy-duty scraper (-XC4) type.

### <Precautions for axial piping type cylinders>

#### Mounting/Removal

- Do not remove the hexagon socket head set screw on the side of the rod.
  - Be aware that if the hexagon socket head set screw is removed with compressed air supplied to the cylinder, an internal steel ball could fly out or the compressed air could be discharged, leading to injury to humans or damage to peripheral equipment.

### <Precautions for compact cylinders with end lock>

#### Pneumatic Circuit

## Caution

#### 1. Do not use 3-position solenoid valves.

Avoid use in combination with 3-position solenoid valves (especially closed centre metal seal types). If pressure is trapped in the port on the lock mechanism side, the cylinder cannot be locked. Furthermore, even after being locked, the lock may be released after some time, due to air leaking from the solenoid valve and entering the cylinder.

#### 2. Back pressure is required for releasing the lock.

Before starting operation, be sure to control the system so that air is supplied to the side without the lock mechanism as shown in the figure below. There is a possibility that the lock may not be released. (Refer to the section on releasing the lock.)

#### 3. Release the lock for mounting or adjusting the cylinder.

If mounting or other work is performed when the cylinder is locked, the lock unit may be damaged.

#### 4. Operate with a load ratio of 50 % or less.

If the load ratio exceeds 50 %, this may cause problems such as failure of the lock to release, or damage to the lock unit.

#### 5. Do not operate multiple cylinders in synchronization.

Avoid applications in which two or more end lock cylinders are synchronized to move one workpiece, as one of the cylinder locks may not be able to release when required.

#### 6. Use a speed controller with meter-out control.

Lock cannot be released occasionally by meter-in control.

#### 7. Be sure to operate completely to the cylinder stroke end on the side with the lock.

If the cylinder piston does not reach the end of stroke, locking and unlocking may not be possible.

#### 8. Adjust the position of an auto switch, so that it could work at the both positions where it is distanced from the stroke and a backlash (2 mm).

When a 2-colour indicator switch is adjusted for green indication at the stroke end, it may change to red for the backlash return, but this is not abnormal.

# Specific Product Precautions 3

Be sure to read this before handling the products. For safety instructions, actuator, and auto switch precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smc.eu>

### <Precautions for compact cylinders with end lock>

#### Operating Pressure

#### ⚠ Caution

1. Supply air pressure of 0.15 MPa or higher to the port on the side that has the lock mechanism, as it is necessary for releasing the lock.

#### Exhaust Speed

#### ⚠ Caution

1. When the pressure on the side with the lock mechanism drops to 0.05 MPa or below, the lock engages automatically. If the piping on the side with the lock mechanism is thin and long, or if the speed controller is away from the cylinder port, the lock engagement may take some time due to decline of the exhaust speed. The same result will be caused by clogging of the silencer installed at the EXH port of the solenoid valve.

#### Releasing the Lock

#### ⚠ Warning

1. Before releasing the lock, be sure to supply air to the side without the lock mechanism, so that there is no load applied to the lock mechanism when it is released. (Refer to the pneumatic circuits.) If the lock is released when the port on the other side is in an exhaust state, and with a load applied to the lock unit, the lock unit may be subjected to an excessive force and be damaged. Also, it is very dangerous because the piston rod will be rushed to move.

### <Precautions for compact cylinders with end lock>

#### Manual Release

#### ⚠ Caution

##### 1. Manual release (Non-lock type)

Insert the accessory bolt from the top of the rubber cap (it is not necessary to remove the rubber cap), and after screwing it into the lock piston, pull it to release the lock. If you stop pulling the bolt, the lock will return to an operational state.

Thread sizes, pulling forces and strokes are as shown below.

Bore size [mm]	Thread size	Pulling force [N]	Stroke [mm]
20, 25, 32	M2.5 x 0.45 x 25 L or more	4.9	2
40, 50, 63	M3 x 0.5 x 30 L or more	10	3
80, 100	M5 x 0.8 x 40 L or more	24.5	3

Remove the bolt for normal operation.  
It can cause lock malfunction or faulty release.

##### 2. Manual release (Lock type)

While pushing the M/O knob, turn it 90° counterclockwise. The lock is released (and remains in a released state) by aligning the ▲ mark on the cap with the ▼ OFF mark on the M/O knob. When locking is desired, turn the M/O knob clockwise 90° while pushing fully, correspond ▲ on cap and ▼ ON mark on the M/O knob. The correct position is confirmed by a click sound “click”. If not confirmed, locking is not done.

## Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “Caution,” “Warning” or “Danger.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)<sup>1)</sup>, and other safety regulations.

-  **Caution:** **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.
-  **Warning:** **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.
-  **Danger:** **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

- 1) ISO 4414: Pneumatic fluid power – General rules relating to systems.  
ISO 4413: Hydraulic fluid power – General rules relating to systems.

## Warning

### 1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalogue information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

### 2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

### 3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

### 4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalogue.
3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

## Caution

### 1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.  
If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.  
If anything is unclear, contact your nearest sales branch.

## Limited warranty and Disclaimer/Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”. Read and accept them before using the product.

### Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.<sup>2)</sup> Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
  2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
  3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalogue for the particular products.
- 2) Vacuum pads are excluded from this 1 year warranty.  
A vacuum pad is a consumable part, so it is warranted for a year after it is delivered. Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

### Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

## Caution

### SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country.  
Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

## Safety Instructions

Be sure to read “Handling Precautions for SMC Products” (M-E03-3) before using.
